

Taiwan leading the world's supply chain of chips

Application for Fall Semester
Deadline: April 10th, 2025

5 MS and PhD Programs

Critical Technology equipped with core competencies in Artificial Intelligence and Sustainability

- Integrated Circuit Design
- Semiconductor Manufacturing Technology
- Semiconductor Packaging and Testing
- Key Materials
- Smart and Sustainable Manufacturing

Faculty-Led

Designed to provide students with cutting-edge, hands-on semiconductor and sustainable manufacturing knowledge

Cross-Cultural Experience

Engage with diverse perspectives while gaining valuable insights into various educational systems and forging lasting connections

Comprehensive Curriculum

Offers a variety of English-taught courses across different faculties. International students can fully engage in this specialized curriculum while benefiting from NCKU's renowned expertise
